David, The dev/repro section is still a work in progress. Here is short list of pieces that I need to complete within the next couple of work days:

- Mode of Action section (nearly complete but in a separate file)
- Evidence integration section: developmental tox text and table descriptors (highlighted)
- Exposure-response array figures will be replaced

My working version is still in track changes, so I can't easily see any minor edits needed. (In other words, focus on the big picture.)

Have fun in FL! Sue
